Heading: Sprint 1 Report, Rideshare Price Comparer, Rideshare Team, 10/23/20.

Actions to stop doing:
So far everything has been working out, we think that the documentation of the newer technologies is a good step forward. This was a learning experience for all of us and we are getting used to the environment. One thing that we should stop doing is trying to rush implementation of technologies. We have plenty of time to implement these newer technologies and if the work does not get done in the current Sprint then we can push it to the next Sprint. Scrum meeting times have been good so far, helps to keep us in track with the workload and our expectations.

Actions to start doing:
What we now have to start doing is getting used to the newer technologies. For example some of us have been writing documentation for Google Maps API and Firebase. We should now all start to get familiar with the technologies. This will help us in implementing it in our next Sprint. Another thing that we should start doing is giving more time on certain tasks that require more work than others.

Actions to keep doing:
We have to keep on checking on each other on the tasks we should be completing. Continue on doing SCRUM meetings based on our current schedule.

Work completed:
Firebase installation documentation, Github repository setup, Website design layout.
As a user, I want a landing page design, so I know what I am going to build for mobile and web.

Work not completed:
As a user, I would like to see Lyft and Uber prices, so that I can accurately compare them to see which is cheaper.

Work completion rate: This section should report the following: total number of user stories completed during the prior sprint. Total number of estimated ideal work hours completed during the prior sprint. Total number of days during the prior sprint. For the previous sprint, the user stories/day and ideal work hours/day figures should be reported.Total number of user stories completed: 3, Total number of estimated ideal work hours completed during prior sprint: 4 hours per person, Total number of days during the prior sprint: 7 days
